Subject: PPIF - Create a Small Minimum Investment

I would like to request that you create a low minimum investment size for these pools (PPIFs) so that small investors can invest. For example, a qualified investor with \$1 million should be able to participate. There are a lot of small investors out there that could and would participate in this program. Similar to the recent presidential campaign, a very broad range of involvement can really add up to big numbers, and it can empower citizens of this country as well.

So please, don't just limit this program to large, institutional investors. Both from a practical perspective of attracting more dollars, and a public relations perspective, put a low minimum on this program.

Respectfully,

Ted Yoch
